A MINE ONLY AT LOW TIDE:

THE GLADHOW IS UNDER WATER PART OF THE DAY.

High Grade Copper Ore Blasted Out When the Surface Is Exposed-New Cranide Works for Deadwood-Crippie Creek Output-Lake Superior Iron Ore Shipments Falling Off.

SEATTLE, Wash., Oct. 22 -A shipment of 300 tons of copper ore from the Gladhow mine, Prince William Sound, was made las week to the Tacoma smelter, being the first large consignment made since the discovery of the deposit. The peculiarity of the property is its location in the sea It is covered by water at high tide and is only accessible for working when the tide is out. Then there is an exposure of ore several hundred feet in extent. is blasted out, placed on scows and loaded thence into steamers and transported to smelters. The ore is high grade copper, carrying silver and gold in good quantities, making it a very desirable shipping ore. This test consignment will determine the future working of the mine on a large and more comprehensive scale by bulkheading and also by drifting on the ledge from the water's edge. It is anticipated that this property, when worked to its all capacity, will give employment to several hundred men and a fleet of vessels in trans-

porting its output. Salmon from the Alaskan canneries has hitherto constituted the bulk of exports from the north, but recently concentrates from the gold mills on Douglas Island and Silver Bow Basin have cut an important figure, and now copper ore is coming to the front. Return cargoes are what all the steamer lines have been desirous of securing and their desire will be

Nearly 1,000 men have gone from Dawson to Stuart River within the past month, attracted by the glowing reports of big discoveries. Winter camps have been established and the majority of them will stay in the country. feeling satisfied that the pay is good enough

fitting than ever before and more winter derelopment will be carried on than at any time ince the discovery of gold. It is predicted that the output of the mines of the Klendike turing the coming year will exceed the conbined output of the past three years. Vancouver is now making effort to direct this yeam of gold from Seattle to that place and is asking aid from the Ottawa Government for the construction of an assay office.

BOUTH DAKOTA.

DEADWOOD, S. D., Oct. 23.-The Imperial Gold Mining Company of Pittsburg, Pa., has practically secured a millsite in this city, where the largest custom cyanide and chlorinating works in the Black Hills will be built. It is to be ready for ore by spring. The plant will be modern in every way, having reasters which will make it possible to treat all kinds of Black Hills ores. Such a custom plant has been needed, The company will treat a large amount of its own ores from the American Express mine located in the Blacktail district. The new plant will cost nearly \$100,000.

Three Michigan companies are now operating on the copper belt, five miles west of Rochford, next to the limestone range. They are the Copper Cliff of Ironwood, British-American the Copper Cliff of Ironwood, British-American Gold and Copper Company of Benton Harbor. This copper belt is several miles long, showing very rich outcroppings, some of which will assay as high as 17 per cent. copper. The Copper Cliff Company has opened into a fine body of copper sulphide, which will average about 3 per cent. The British-American Company has commenced a shaft which will be sunk 300 feet to strike an incline ledge of copper and gold ore that is twenty-five feet wide at the surface. The Black Hills Copper Company has an incline shaft down 140 feet, following down a wide ledge of gold and copper ore which assays an average of \$4 in gold and 2 per cent. copper. There seems to be several separate ledges of copper and gold bearing ore running through this district. The theory that was held by many of the earlier mining experts and geologists that all of the copper found on the surface in the Black Hills was brought there during the slacial age has been disapproved in recent months by reason of the deep shafts that have been sunk longer of the deep shafts that have been sunk as present. In Custer county Eastern capitalists have sunk a shaft over 300 feet deep in the Vigilante mine, following down a fissure vein of copper ore that averages about 3 per cent.

The aew examide plants of the Wasp No. 2 and the Portland Mining Companies, have started up, making eleven cyanide plants now in operation in Lawrence county. The process Gold and Copper Company of Detroit and the

is proving to be much better adapted to treating the different Biack Hills ores than anticipated by its most enthusiastic promotors. The Shawmut Mining Company of Goston, Mass. Spearfish Mining Company of Goston, Mass. Spearfish Mining Company of Colorado Springs, Col., and Homestake Company will all have their plants in operation within the next sixty days.

The prospect is good for the mining of antimony in the Black Hills in a very short time. A. D. Arundel of Minneapolis has purehased the claims north of Silver City in Pennington county and for several weeks past he has been opening up a very wide ledge of grandary to the success of the Big Bend Mining Company on Rapid River, in Pennington county, there is considerable interest in other placer diggings, which it is believed, can be made very good payers by using the same methods for obtaining the sold as the Big Bend Company. This company now handless Loop yards of gravel a day and the lowest value per yard is 50 cents, while much of it runs \$1 and even \$3 a yard. The company has over seven thousand feet of gravel that is just this rich. It has been operating since April and will not close down until winter sets in. Two prominent New York city men are backing the enterprise. The company has been clearing up over \$30 a day for some than. Next season the plant will be enlarged so that Loop tons of gravel can be handled an hour, which would give to the company has been clearing up over \$30 a day for some than. Next season the plant will be enlarged so that Loop tons of gravel can be handled an hour, which would give to the company has been clearing up over \$30 a day for some than. Next season the plant will be enlarged so that Loop tons of gravel can be an ade from an irror cre which is mined and shirped by rail from a place near Nahant, on the Burlington route. The company is to be reorganized soon and that active work is to be commenced on some of the gold and tin properties in Pennington county.

Colorado Springs, Oct. 23.—The Cripple

all shipments for the year. No ore sales are being made and it will be too late to do much after election if there springs up a demand for ore which most miners expect. A few of the eastern mines, Menominee and South Marquette ranges, may ship by rail if a sudden call comes for ore late in the year.

The Oliver (Carnegle) Company is examining the Corrigan, McKinney & Co. group at Crystal Falls with a view to purchase. These four mines, Crystal Falls, Liucoln, Lamont and

Great Western, are all non-bessemer ores' running from 0.5 to 1.0 per cent, phosphorus and are very suitable for the manufacture of open-hearth steel, such as the Carnegie Company is now increasing its facilities for. The price for the four is in the neighborhood of \$1,000,000. They were bought by present owners at intervals in the last four years at a few thousand dollars each. No one of the four cost as much as \$10,000.

The Imperial and Webster mines of the Cleveland Chils Company at Michiganome have been closed down, retiring 280 men. The pumps are kept at work. If McKinley is reelected the nines will probably reopen during the winter.

pumps are kept at work. If McKiney is reelected the nines will probable reopen during
the winter.

The Bimabik mine has closed shipments after
an output of 915,000 tons, all the ore it had sold.
About 300 men are retired. Work in stripping
at the mine continues.

A lease for thirty years at 50,000 tons a year
and on a royalty of 25 cents a ton has been made
to the Chisholm fron Company on a location
adjoining the Clark mine. It will be opened
as a mine this winter.

During the coming winter the Duluth and
fron Range road will complete the doubletracking of its entire main line to the Mesabarange, laying 100-pound rails, the heaviest in
use. The Duluth, Mesaba and Northern (Rockefeller) will extend its double track twenty or
thirty miles, and the third ore road, the Eastern Minnesola, will lay a new line fifty miles
long and a double track ten miles.

The manganese deposits at Copper Harbor
are found to be large and of high grade, and
several cargoes will be shipped this fall. Mining will be carried on energetically all winter
and a large tonnage will be mined in 1001. It
is expected that this manganese will displace
the Colorado product in furnaces in the central West.

The last ore cargoes from the new mines

is expected that this manganese will displace the Colorado product in furnaces in the central West.

The last ore cargoes from the new mines the new ore range of Michipleotin, northeast shore of Lake Superior, will be sent out next week. In all 50,000 tons have been shipped this year. The company's four ocean-going ships sail for Liverpool from Conneaut with steel early in November. They will be in the Spanish and Elban ore trade during the winter. When they return next spring they will be accompanied by eight more, four steamers and four barges, now being built in England. All twelve will carry ore from Michipicotin next year. The expected tonnage of the year is 1,000,000 tons and in order to mine and crush this a large force will remain at the mine all winter. It is impossible to get in or out during the winter months and \$80,000 worth of food supplies are now being taken in. This quantity indicates the extent of the company's expectations for work during the coming six months.

The Union mine has begun shipments and ill send out cargoes until the close of navigation.

The Seruntry mine, idle since July, has resumed. It is a property of the wire combine and sends its ore to that company's furnaces.

Nearly all the Oliver (Carnegie) explorations on the Menominee range have been stopped and the machinery withdrawn. WASHINGTON.

washington.

Seattle, Oct. 22.—The mines in Goat Lake district, east of Monte Cristo, have been developed beyond the prospect stage and are now regarded as mines in the fullest sense. Several thousand feet of tunnelling and dritting has been done and a large amount of ore has been blocked out, awaiting transpertation or reduction. It is stated that a smelting plant may be built in the spring.

At Monte Cristo the force has been generally increased in the mines and concentrator, and the camp is assuming the appearance prevailing in the most prosperous times. A good deal of ore is being shipped to the smelters and mines that were shut down during the closing of the railroad are again working to their full capacity. Mines that were virtually abandoned, have also been taken up again and are getting into good shape.

On Gold Creek, near the summit of the Cascade Range, in Kitubas county, a great deal of work has been done this season in mines owned by Seattle men, but no shipments have been made, although there is large accountation of ore on the dumps and a large amountation of ore on the dumps and a large amountation in sight in the workings. This is silverlead ore that has netted at the Puget Sound smelters 200 to \$110 a ton. This district is twenty-six miles from the Northern Pacific Railroad, the nearest station being Easton, the eastern portal of Cascade tunnel. The country, besides being highly mineralized, is excellent for agricultural purposes, but is sparsely settled. It abounds in game and is dotted with beautiful mountain lakes filled with trout.

The demand for coal has increased so rapidly

to keep up steady shipments for several years. In Ymir district, the Tamarae group, which has been under development for some time, is preparing to ship forty tons a day.

of the gold and tin properties in Pennington county.

Colorado.

Colorado.

Colorado Springs, Oct. 23.—The Cripple Creek output for October is estimated at \$2,231,-250 against \$1,831,000 for September. For Colorado for 1890, the output was \$1,888,900. For ten months of 1900 the record is \$20,002,038, a gain of about \$8,000,000 over the corresponding period for 1890. For the fiscal year past the total yield is \$27,007,938. For November and December, 1890, the output was \$5,015,000. The gain this year over last, as seen in the second for ten months past, insures at least \$28,000,000.

To three or four months past much surface.

IDAHO CITT, Oct 21.—The War Eagle Company's new forty-stamp mill at Quartzburg has started up and is doing good work. The Iowa and Yellow Jacket mines are furnishing abundance of ore and it is yielding good profits. The long tunnel running through the Iowa to enter the Yellow Jacket a few hundred depth. The face is now over 500 feet below the seatered. Placer miners are getting their claims ready Placer miners are gett

in gold, silver and copper has been found by the relocaters, in large quantities. The first carload netted \$1,600. The mine was a large producer in the early days and again bids fair to achieve distinction. A strike of eighteen inches of ore assaying \$280 and two feet running \$200 in gold is re-ported on the 600-foot level of the Kennett mine at Virginia City. \$280 and two feet running \$200 in gold is reported on the 600-foot level of the Kennett mine at Virginia City.

The Dickerson Mining Company, recently organized in New York, has purchased and will operate on a large scale claims on Basin Creek, near Basin.

Twelve carloads of ore from the new Copperopalis district netted \$20,000 gross, which places that camp upon a substantial footing.

Considerable excitement exists at Mammoth over a rich strike in the Boulder Mountain mine. The vein is two feet wide and assays \$300 in gold.

The ore shoot in the Cracker lead, Blackfeet reservation, has been struck. There are between seven and eight feet of copper ore, or enough to keep the concentrator busy. The ore assays is per cent. copper, \$12 in gold and 15 ounces sliver.

A COLUMBIA ATHLETES BUSY.

Oarsmen Have Their Eyes on Fall Regatta

-Golfers and Chess Players.

Rowing practice has been indulged in at Columbia during the past week under uncertain conditions. All the oarsmen have their eyes on the university fall regatta, which will be held on Nov. 10. Singles, doubles, fours and eights are entered, and a prominent rowing graduate has offered to present medals and beer steins to the members of the winning crews. Coach Hanlan has taken particular care of the three freshmen eights from the college and schools of applied science, coaching them from his single shell and from the coxswain's seat in the several boats. When in the shell he makes the coxswains stand up in their seats and aid him in the coaching by keeping the men steady and straight over the keel of the barge. Hanlan is now rowing the men for two miles at a stretch, and he calls these tactics his "tests of endurance." The composition of the various shells is as follows: College—Bow, Pitou: 2, Freeman: 3, Houston; 4, Vogel; 8; Carlsson: 6, Updike (captain); 7, Maeder; stroke, Rollins; cexswain, Schrieber.
Mines—Bow, Savage; 2, Sherron; 3, Ashley: 4, Alexander: 5, Stangland: 6, Hochsprung: 7, Jackson: stroke, Mackay: coxswain, Comstock, Science—Bow, Smille; 2, Carleton: 3, Attwood; 4, Merritt; 5, Phillips; 6, Cock; 7, Earle; stroke, Fraser; coxswain, Tyler.

Coxwein, Tyler.

Up to the present time the Executive Committee of the Columbia University Golf Club has been unable to secure a suitable course for practice. Dr. J. A. Wells of the Englewood practice. practice. Dr. J. A. Wells of the Englewood Club is considering an application from the Varsity golfers and hopes to get the privileges of links for them. An offer has been received from the owner of the Laurence Harbor course to the effect that Columbia would receive the right to use that course provided the college kept the links in good condition. The course, however, is a long distance from the nearest railroad station, and it is feared the offer will have to be declined. The officers of the club have investigated property in the neighborhood of Woodlawn, owned in part by the I niversity. It was found suitable for a nine-hole course, but it has been learned that the estate is soon to be sold and divided up into building lots, and the application to the Englewood Club is now the only hope.

The Idea of a fall tournament has been

the application to the Englewood Club is now the only hope.

The idea of a fall tournament has been abandoned for the present at least. Several team matches will be contested at Van Cortlandt Park, and Capt. J. A. Edwards has adopted the following plan for choosing a Varsity squad. The players wi, be divided into sets of four or more, according to their ability so far as can be judged. A candidate in any division will receive the right, after beating one of the men in his own division, to challenge any contestant in the division above him for the latter's place, which, except in special circumstances, he will be entitled to in case he wins from that player. The loser will drop into the division below, and must win a match there before he gets the right to try to regain his former place. The divisions thus far determined upon are as follows:

First—S. P. Nash, '01; J. G. Bates, '03; W. L. Clever, '12, Cart J. A. Edwards '03. termined upon are as follows:
First-S.P. Nash, '01; J. G. Bates, '03; W. L.
Glenny, '02; Capt J. A. Edwards, '01.
Second-N. M. Burrell, '02; law; L. Rhoades, Jr.,
'02; F. E. Baxter, '01, law; E. H. Lewis, '02, law,
Third-A. R. Allan, '02; W. S. Blun, '03; H. D.
Bulkley, '01; L. E. Mahan, '02; H. M. Bissell,
'02, law; S. S. Boardman, '02, law; P. V. Raisbeck, '03, and H. R. Worthington, '03.

Columbia has accepted the challenge of the Princeton Chess Club for a team match of ten men on a side. The contest will be held at Princeton on Nov. 24. Twenty-nine men have entered the tournament to select players on Morning ide Heights. These players have been divided by lot into sections and the first two in each section will play in the finals. The draw-ings have been made as follows:

Elaborate preparations are being made for Elaborate preparations are being made for the lacrosse campaian. Cyrus C. Miller of the Crescent A. C., who ceached the team last year, has voluntarily offered his services again. Forty-two candidates have reported to Capt. Lindsay, including all except two men from last year's champion team. Lindsay is playing goal: Schwerin, second defence, Colwell, coverpoint; Coggeshall, centre, Stuart, outside home, O'Dwyer, point; Pfetchinger, first defence, and Bigelow, second attack. The new men are light and swift, and include several old players from other institutions. There are Lindheim from Johns Hopkins, Covert from Hobart, and Adams and Boyd from C. C. N. Y. A new departure will be taken in the formation of a freshman class team to meet teams from other colleges and universities. Besides the games in the interuniversity series with Harvard, Cornell and Pennsylvania, Manager Parker will arrange contests with Swarthmore, Johns Hopkins, Lehigh, Stevens, Hobart, Crescent A. C. and the

contests with Swarthmore, Johns Hopkins, Lehigh, Stevens, Hobart, Crescent A. C. and the Staten Island A. C. Cross-country running is progressing favor-ably. An interclass run will be held over the Morris Park course on Nov. 10. Teams will consist of ten men from each class, college and science, and one each from the law and medi-cal schools.

acience, and one each from the law cal schools.

About twenty men have come out for this year's hockey team so far, all of whom are practising regularly every afternoon on the handball courts of the gymnasium. Regular training will be required this year for the first time, to begin with the ice practice about Nov. 4 at the St. Nicholas rink.

Jimmy Handler is another boxer who is anxious to put up his hands against Joe Walcott.
George Dixon and Tommy Sullivan of Brooklyn may be matched to meet in a six round bout at Chicago in a few weeks.

Jack Daly of Wilmington wants to tackle Tim Kearns again. Daly says that he will cover any money which Kearns may deposit.

Maher at Chicago in a six-round bout. Sharkey has wired back his acceptance and is waiting to hear from Maher.

Frank Erne states that the \$500 which he put up at Chicago to arrange a match with Terry McGovern has not been covered by the little champion. Erne is willing to make a match with McGovern at 153 pounds, weigh in at the ringside.
